Usage Notes: None

Please note that data provided by the Roper Center for Public Opinion Research may not be re-disseminated without written permission. The results of any analyses conducted on the data may, however, be published with appropriate acknowledgments and source citation.

Data Provider Methodology

The design included 1,535 randomly-selected cases from the general 40+ US population.

Additional interviews were conducted to achieve the following samples:

341 Hispanic/Latinos age 40+ (conducted in both English and Spanish)

399 African Americans age 40+

310 Asian Americans age 40+.

The data was weighted by age, gender.

Analysis with the general population may be conducted using the general population weight named "Weight1". To support subgroup analyses, additional cases were gathered resulting in augment samples (African-American, Non-Hispanics, Asian, Non-Hispanics, Hispanic cases all age 40 and older). Analysis with these samples may be conducted using the race augment weight named "Weight2". A final weight, "Weight3" weights all cases as if they were randomly-selected. It is applied so that analysis may include, or comparisons may be made between, the respondents in the augment samples and the respondents excluded from the augment population (e.g. "white, non-Hispanic", "multirace/other race" respondents).

Administration was online via GfK's representative Knowledge Panel fielding December 8 – December 19, 2016 among a nationally representative sample of 2,585 Americans age 40+.
